

AUSTRALIAN STEEL INSTITUTE

# ASI's FREE EDUCATION SUPPORT PACK

As the nation's peak body representing the entire steel supply chain, the Australian Steel Institute (ASI) promotes, educates and supports the Australian steel industry. As part of ASI's commitment to supporting the steel industry, we offer a free Education Support Pack. This gives both academics and students access to the latest information on steel design and construction, awards students for their academic achievements in steel design, and sees ASI experts deliver guest lectures.

## FREE ACADEMIC MEMBERSHIP

Free ASI [Academic Membership](#) is available to lecturers and teachers in engineering, architecture and construction at Australian universities and TAFEs which offer courses that further the steel industry as part of its curriculum. Benefits include:

- Full access to the ASI online eLibrary
- Borrow hard copy books from library on loan
- Member discounted rates for all bookshop purchases
- Member pricing for all events and webcasts
- Discounted member rates for all ASI eLearning courses
- Member only Exclusive offers with selected partners
- Regular industry updates and newsletters
- Opportunity to vote at ASI AGM

For further information, contact John Gardner (National Education Manager - Technical, ASI) on [johng@steel.org.au](mailto:johng@steel.org.au)

## STUDENT AND ACADEMIC FEEDBACK

"The Design of Portal Frame Buildings book has been invaluable for understanding and progressing through my current design project at university. Being able to buy these books for a discounted price just for signing up as a student member has been incredibly helpful to me."

~ Dean Campbell (Third Year Student, Bachelor of Civil Engineering)

"The ASI eLearning portfolio is a fantastic resource to continue to develop skills in topics covering the entire steel supply chain."

~ Phillip Visintin (Associate Professor, School of Civil and Environmental Engineering, The University of Adelaide)

"As a student at Southern Cross University, studying a Bachelor of Engineering Systems and majoring in Civil, I have found the student content and discounts offered by the ASI to be invaluable in relation to the structural stream of my degree."

~ Mitchel Hill (Student, Bachelor of Engineering Systems, Southern Cross University)

## FREE STUDENT MEMBERSHIP

Free ASI [Student Membership](#) is available to full-time students who are studying subjects such as engineering, architecture, construction and welding at universities and TAFEs in Australia. Benefits include:

- Full access to the ASI online eLibrary
- Access to ASI Student member resources
- Member discounted rates for all bookshop purchases (limit one copy per publication)
- Member pricing for all events and webcasts
- Special discounted student rates for all ASI eLearning courses
- Regular industry updates and newsletters

AUSTRALIAN STEEL INSTITUTE

The free student membership with the Australian Steel Institute has provided me with access to important resources which have helped me progress with several assignments in the later years of my civil engineering degree. I have utilised the generous discounts at the online ASI bookshop which is made available to all student members. Here you can purchase literature on Australian standards approved design methods and guidelines. I encourage other engineering students who are interested in pursuing a career in structural engineering to sign up for an ASI membership to keep up to date with best practice design methods.

~ Alex Omelaniuk (Student, JCU Townsville Campus)

## TAKE ADVANTAGE OF A RANGE OF BENEFITS

### STUDENT DISCOUNTS

ASI is proud to support the education of the next generation of steel industry professionals with a substantial 80% discount on all our [eLearning courses](#). As a registered ASI Student member, simply use the discount code *ASlstudent80* at check out. Convenient and available all year round, our eLearning courses enable are engaging and enriching, and range from two to six hours.

### eLEARNING COURSES

We believe education is our best opportunity to support a highly effective and efficient supply chain, from engineers, architects, fabricators, right through to students and academics. Our [eLearning](#) courses are based on previously-held live ASI seminars and webinars covering topics like best practice, compliance, Australian Standards, regulatory updates and the latest steel products.

### RESOURCES

No matter where you are in your career, we have [specialist resources](#)—books, journals, magazines and technical notes—to assist. The [ASI eLibrary](#) is the largest of its kind in the Southern Hemisphere. It stocks over 4,000 volumes dating back to 1964. The regularly maintained database holds over 20,000 resources on steel design, construction, fabrication and project management.

## STUDENT AWARDS

Each year, the ASI offers awards to the students who achieve the highest grade in their third year steel design subjects at Australian universities across the nation. Students are assessed by their own university based on the results of their steel related subjects. The winning students receive an eLearning voucher up to the combined value of \$500, so that they can take advantage of the ASI's diverse range of online courses.

If your university is interested in establishing an ASI sponsored award, email John Gardner (National Education Manager - Technical, ASI) on [johng@steel.org.au](mailto:johng@steel.org.au)

## GUEST LECTURERS

ASI State Managers are available to provide free student lectures on steel design and construction to students at Australian universities to support their studies.

## ABOUT THE ASI

A member-based organisation, the ASI exists to represent the Australian steel industry and support its growth, maintaining and creating jobs and income for Australia. We provide leadership on all major strategic issues, ensuring that political decision makers, industry, consumers, allied industries and other key stakeholders continue to recognise the strength, beauty and versatility of Australian steel.

**Our Vision:** To influence profitable growth for the complete Australian steel value chain.

**Our Mission:** To deliver increased use of Australian steel and improved industry competitiveness in construction and other strategic markets.
