## Dwyer embraces SSA scheme

### Member profile

Dwyer Engineering and Construction has become the 51st site and the 37th company to receive certification under the ASI's Steel Sustainability Australia (SSA) scheme. The 2B certification enables the company to supply to construction projects requiring the relevant Green Star accreditation. Company general manager Jack Dwyer said his company was committed to conserving energy, and reducing the generation of waste and discharge of contaminants to the environment. The 2B certification saw the company awarded 10 responsible product values (RPVs) and recognised as demonstrating 'good practice' in sustainability. Dwyer said the company welcomed the SSA process, and would encourage its subcontractors to do the same. The Western Australian-based multi-disciplined engineering company specialises in the provision of turnkey packages and ongoing maintenance support to civil, structural, mechanical and piping projects of the mining, commercial, and oil and gas industries. To find out more go to <https://dwyereng.com.au>.

## Icon Metal opens door to students

*Helping hand ... Icon Metal encourages new generation of steel workers.*

### Member profile

The ASI is providing real-life work experiences for students in a joint partnership with ASI member Icon Metal and the NSW Government. The two-hour program of work activities was held at Icon's western Sydney premises on July 26. Funded by the NSW Government's Regional Industry Education Partnerships (RIEP) program, students got to learn about the lifecycle of a project from tender to fabrication, management, and installation in a real business setting. They were then taken on a walking tour through the workshop and finally completed the program with a hands-on activity where they used the various machines, saws and a welding simulator. ASI members wanting to donate their services for future programs should contact ASI training and development manager Anne Lobascher on 0458 907 195 or [annel@steel.org.au](mailto:annel@steel.org.au).

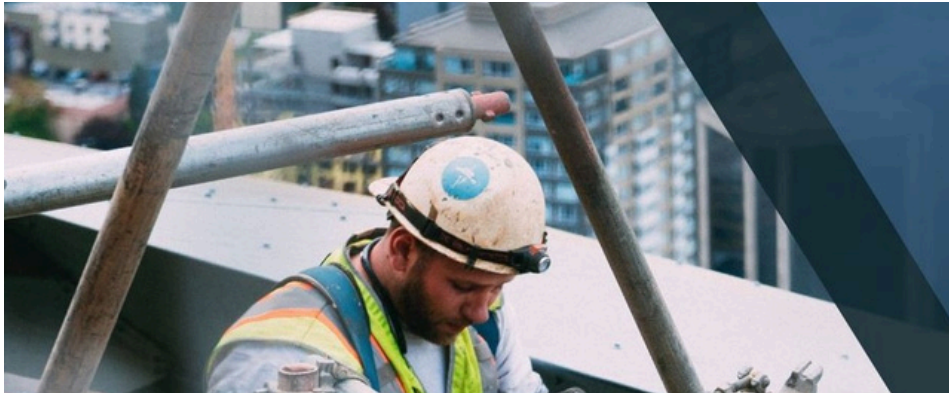

## One-stop shop for transport

### Member profile

Looking for a one-stop shop in Adelaide for transporting long steel loads to local and interstate construction sites? Adelaide Trucks and Vans (ATV) is an ASI associate member and proud SA-owned business operating in Cavan that has the knowledge, experience and resources to provide cost-effective, and innovative delivery solutions. ATV caters for long loads, oversized loads, time drops, regional / interstate loads. It has utes, multi-size trucks, semis with various size trailers including extendable trailers, crane trucks and also storage. To find out more, contact 08 8166 7539, email [adelaidetruksandvans@gmail.com.au](mailto:adelaidetruksandvans@gmail.com.au) or go to <https://adelaidetruksandvans.com.au/>.

# Find the right person with TalentBlue

## Member profile

Finding the right person to fill a manufacturing and construction role is never easy. Help is now available through specialist recruiter TalentBlue, a new ASI member specialising in job recruitment for our fabricator members. Whether it's a fitter or welder, boilermaker or rigger, they can help you find the best person for the job. TalentBlue's addition to the ASI ranks is part of a ramped up focus by the ASI on generating interest in steel careers. Supplementing the ASI [Jobs Board](https://jobs.steel.org.au) (<https://jobs.steel.org.au>), TalentBlue's experts are on call to help you make the right job recruitment decision. Their experienced account managers prescreen and vet the labour pool to match your requirements. Their complete workforce solutions include sourcing, recruitment, induction, mobilisation, management and beyond. TalentBlue is a proud sponsor of Steel Chicks, an organisation promoting diversity and greater involvement of women in the steel industry. Call TalentBlue now on 1300 377 388, or go to [www.talentblue.com.au](http://www.talentblue.com.au) for more information.

# Apex Steel Supplies embraces SCA/SSA

## Member profile

Part of the privately owned Apex Group, South Australia-based Apex Steel Supplies has grown to become a leading supplier of roofing, cladding, rainwater goods, custom flashings, sheet metal, purlins, battens, fencing, RHS, pipes, structural steel, merchant bar and sheet and coil services. Sales manager Paul Baldassari said Apex Steel Supplies joined the ASI to take advantage of the networking opportunities it provides, branding and the ASI's range of compliance solutions including the Steelwork Compliance Australia (SCA) and Steel Sustainability Australia (SSA) certification schemes. SCA provides quality compliance certification for the supply, fabrication and erection of structural steelwork to AS/NZS 5131 by the requirements of the ASI National Structural Steelwork Compliance Scheme (NSSCS). SSA ensures products supplied by steel fabricators and downstream processors comply with best practice in sustainability. To find out more about Apex Steel Supplies, email sales manager Paul at [pbaldassari@apexsteel.com](mailto:pbaldassari@apexsteel.com), telephone 08 8281 4911, or mobile 0427 345 701.

# Minerva provides expert help on audits

## Member profile

Fabricators going through the audit process can now turn to new ASI member Minerva Engineering and Inspections for help. The company is experienced in AS/NZS 5131 and ISO 3834 audit preparation, and welding and painting inspections. Operations coordinator Mahadev Pillai says his experienced team provides expert guidance and assistance in understanding and achieving CC2 and CC3 compliance with AS/NZS 5131. "We work closely with clients, conducting thorough free initial assessments and audits to ensure that construction activities and materials meet the specified criteria, safety standards, and regulatory requirements." To find out more, contact Mahadev on 0405 019 224, email [info@minervaengineering.com.au](mailto:info@minervaengineering.com.au) or go to <http://www.minervaengineering.com.au>.

# New members

The ASI welcomes the following new company members:

Abergeldie Structural Fabrications Pty Ltd	Fabricator	NSW/ACT
Halina Engineers Pty Ltd	Professional	NSW/ACT
Minerva Engineering & Inspections Pty Ltd	Associate	WA
TalentBlue P/L	Associate	Vic
Southern Steelworks	Fabricator	WA
Steelworks Engineering Pty Ltd	Fabricator	NSW/ACT
Mayric Engineering	Fabricator	NSW/ACT
Hergs Weld	Fabricator	NSW/ACT
Dynamik Structural Australia	Fabricator	SA
Saunders & Ward Pty Ltd	Fabricator	Tas
Apex Steel Supplies (Distribution)	Distribution Centre	SA
Apex Steel Supplies Pty Ltd (Roll former)	Manufacturer	SA
MIS CarbonArt	Professional	WA

# Convention update

If you haven't registered for the September 10 [break-out session](#) at next month's ASI annual convention, now is the time. The *Environmental Sustainability of Steel in the Building and Construction Industry* seminar can be attended in-person or viewed online. Details: <https://www.steel.org.au/news-and-events/events/environmental-sustainability-of-steel/>.
